EXAMINER'S AMENDMENT

1.   An examiner's amendment to the record appears below. Should the changes

and/or additions be unacceptable to applicant, an amendment may be filed as provided

by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be

submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview

with Richard Hinson on June 5, 2008.

The application has been amended as follows:

In the claims:

14.   (Currently Amended by the Examiner)   A system <u>including a processor and a</u>

<u>memory</u> for reformatting data, the system comprising:

a buffer for receiving documents formatted in a first markup language;

<u>a content converter system operating as an interface between a client and a</u>

<u>server, the content converter system including</u> one or more templates for extracting data

from the received documents <u>and presenting the extracted data in a second markup</u>

<u>language</u>, each template having at least one content marker for extracting data from

said received documents in accordance with an ordering of the at least one content

marker in the one or more templates, wherein said extracted data corresponds to at

least one among a type of data and a particular action from formatted content in said

documents, wherein each said template corresponds to at least one document and a

second target markup language and is customizable by a user to extract in one or more

combinations information from a corresponding at least one document based upon the

at least one content marker, wherein each content marker indicates a data offset for

identifying within the specified document data at least one data field containing

information corresponding to the predetermined topic, and wherein the at least one

content marker further specifies at least one among markup language tags, code, and

additional text to associate with the information contained in a particular data field when

presented in said second target markup language;

a template table for associating each of said templates with a corresponding

document, with a network location identifier of a particular document, and a particular

target markup language; and,

a formatter for formatting said extracted data for presentation in said presentation

order using the second target markup language;

wherein the content converter system is configured to

receive a content request from the client, said content request specifying a

network location from which a specified document including formatted content in

the first markup language can be retrieved, said content request further indicating

the second target markup language;

respond to the content request by identifying a template which

corresponds to said specified document and said target markup language using

the template table;

apply said template to said specified document and extract data from said

formatted content based upon the template by identifying a presentation order of

the at least one content marker in said template, and extracting the information in

said data fields from said specified document in accordance with the presentation

order; and

format said information by the markup language application of the content

converter system for presentation in said presentation order based upon said

associated markup language tags, code, and additional text specified in the

template, wherein said formatting produces a second document formatted for

presentation according to the second target markup language.

Conclusion

Any inquiry concerning this communication or earlier communications from the

examiner should be directed to JOSHUA D. CAMPBELL whose telephone number is

(571)272-4133. The examiner can normally be reached on M-F (7:30 AM - 4:00 PM).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Stephen Hong can be reached on (571) 272-4124. The fax phone number

for the organization where this application or proceeding is assigned is 571-273-8300.
